HARD.SKILLS

Skills, that I used in my previous job: **React**  and **Vite** 

State manager is a **React-redux** 

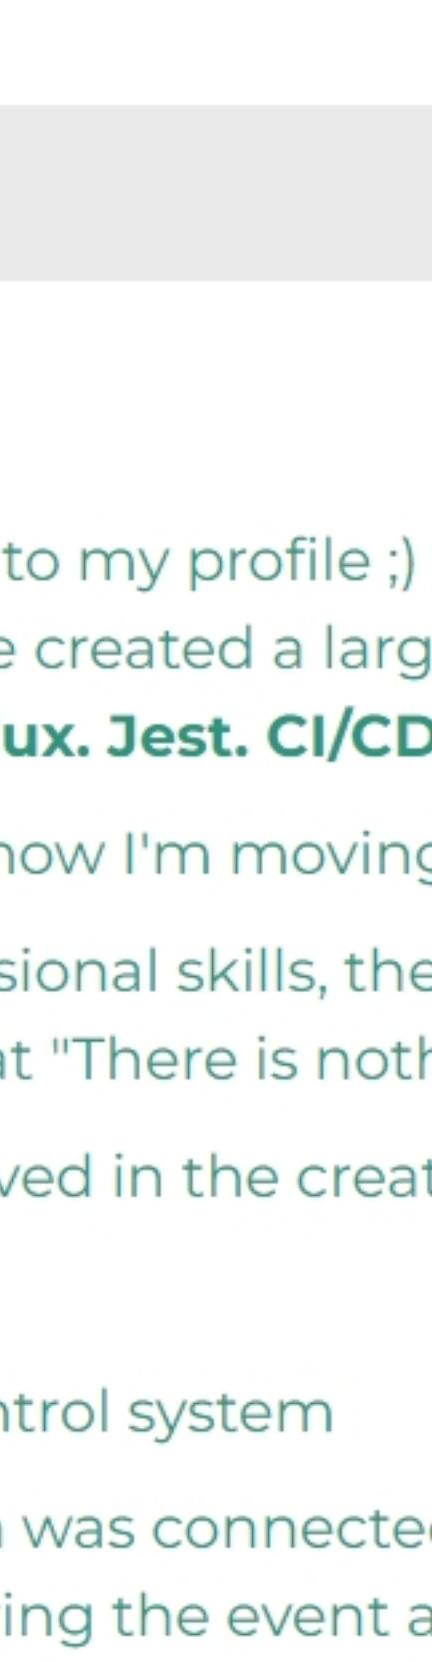

Api manager is a **RTK Query** 

Feature-Sliced Design architectural methodology

What about another skills?

FRONT-END

TypeScript

React

NextJS & Vite

React-Redux & RTK-Query

FSD & Classic architectural

REST API

SaaS APP

Figma & Sketch

React Native

Canvas

BACK-END

PHP (Laravel)

C#

NodeJS (ExpressJS)

HOBBY

Unity

Crypto (Smart Contract)

ABOUT ME

Hello everyone!

I am glad to welcome you to my profile :) My last place of work is the American company SymmetRE - together with the team we created a large, modern application on **React + Vite. 200+ reducers. 75,000 additional in GitHub. Redux. Jest. CI/CD** Created hundreds of pages with graphs, tables and parsers.

Very cool experience and now I'm moving on.

If we talk about my professional skills, then when designers say - "Do you like our solution? - Is it not so difficult?" My answer is that "There is nothing to scare me anymore" 😊

Before the war, I was involved in the creation of StartUps and projects in my hometown - Mariupol.

The main ones are:

1. VAHTA - Attendance control system

SASS product. CRM, which was connected to a scanner that read information from the cards and transferred it to the program. Structuring the event and transforming data into graphs, tables, etc. 3 clients

2. MION - Social network for teachers and students

SASS product. The system consisted of a Web-app, Cabinet, Promo Page with which teachers shared their lessons and homework with students. 10+ clients

I have the experience as a teamlead of 7 people (Task Manager - Linear)

I always work according to the principle of using the most modern approaches in technologies. Actively worked on the development of IT in my region. I was a speaker at 3 IT events. One of them is the large-scale event "MRPL IT WEEKENDS" - more than 350 IT specialists. Developed my own program for training Junior Front-end developers and created the educational YouTube channel. My main approach in work is meeting deadlines and continuous learning and development.

Now, I want to find a job in a company for the position of **Senior/Middle+ Frontend Developer or STO**. And use all my experience to improve or build a cool product for the company. I will be glad to cooperate! 😊

EXPERIENCE

04.2022 - 07.2023

Real Estate Software Platform
"SymmetRE"

MIDDLE+/SENIOR FRONT-END DEVELOPER

We created a complex CRM system to manage the real estate building process.

Main responsibilities:

- Creating page & interface for application
- Optimization code

Achievement:

- Implemented TypeScript in project
- Implemented RTK Query and api-generate
- Implemented FSD architecture

11.2021 - 03.2022

Educational and social network
"MION"

FULL-STACK DEVELOPER

After successfully creating an online platform SASS solution. Created a project of an educational social network that combined all platforms. Company product - Web application, CRM system for product management.

Main responsibilities:

- Project architecture development
- Deploying a server on nginx
- Deploying Interfaces with React + Next

Achievement:

- Project architecture development
- Deploying a server on nginx
- Deploying Interfaces with React + Next

09.2021 - 11.2021

Educational platform
"MOTICH IT PRO"

FULL-STACK DEVELOPER

Using React+Next, I created an online educational platform project. The platform implemented an assessment system, a system for checking and doing homework, a rating system.

Main responsibilities:

- The architecture was originally written to scale the project, as a SASS solution.

01.2021 - 09.2021

International IT- company ZendoTeam

MIDDLE FRONT-END DEVELOPER

Worked remotely at Zendo. Specialization - SASS solutions for MLM business. Company product - Web application, Android & IOS application, CRM system for product management

Main responsibilities:

- UI development with React
- Supervision of junior developers

Achievement:

- Participated in the briefs of the product improvement team
- Actively assisted and trained new employees

06.2020 - 12.2020

VAHTA attendance system

FULL-STACK DEVELOPER

Created an attendance control system on React(React-Native) + Laravel. The project conditionally had two implementation models. The first is a card scanning system, a Web application using a QR scanner reads the code on visitors' cards and the system saves information about visits, as well as monitors the financial condition of the client. The second model - using the application on two phones. One of them has an account of the event or event organizer, and the second is an event visitor. Visit information is also stored by the system and displayed to administrators.

Main responsibilities:

- Creating product
- Scaling product

Achievement:

- Active app scaling
- Start creating a component library for all applications

02.2020 - 03.2022

IT Academy "ITStep"

FRONT-END TEACHER (REACT)

Worked at the Mariupol branch of the academy as a front-end teacher. Trained over 50 students. During the course students studied HTML/CSS, JavaScript, gulp/webpack, git

Main responsibilities:

- Collected independently and released 2 groups for learning React - created a program for this course

01.2020 - 03.2022

Communal institution "M SPORT"

CHIEF SPECIALIST OF IT DEPARTMENT

Remotely worked in a municipal institution of the city of Mariupol - M SPORT

Main responsibilities:

- Site support and administration

- System administration

Achievement:

- Development of an assessment system for employees (React)
- Creating a beta version of the M Sport mobile application (React Native)

07.2018 - 12.2019

Web-studio "Digital Excalibur"

FULL-STACK DEVELOPER

I worked as a Front-end developer, and then as a Back-end developer in a web studio that developed landing-pages, corporate and information sites.

Main responsibilities:

- Creating FE Side for web-sites

- Creating BE Side for web-sites

Achievement:

- The studio has implemented more than 15 projects of varying complexity and focus

EDUCATION

2018 - 2019

JUNIOR REACT DEVELOPER

Udemy

2018 - 2018

JUNIOR BACK-END DEVELOPER

Beetroot Academy

2017 - 2017

JUNIOR FRONT-END DEVELOPER

Beetroot Academy

2012 - 2018

MASTER OF DEGREES WITH HONOUR

PSTU speciality "Mechanical engineering technology"
